

HARDY FERNS

STRONG NATIVE PLANTS

XX Size, \$15.00 per 100.

Average Run, \$10.00 per 100; \$75.00 per 1000.

We collect for definite orders only and you are assured of freshly dug, thrifty plants. Fall shipment for planting and storage gives best results as our spring digging season often opens late for southern planters.

Plant shallow, wet down, and mulch until started. Ideal plants for the rockery, pool, foundation planting or any shady, moist location.

Potted plants turn readily at added profit.

Lady Fern

LADY FERN (*Athyrium Filix-femina*). One of the best medium growing ferns for general planting as they remain in the clump; finely cut foliage.

OSTRICH (*Matteuccia struthiopteris*). Best all around tall growing sort.

CLAYTON or Interrupted (*Osmunda Claytoniana*). Tall sort for drier locations; woolly fronds as they expand.

CINNAMON (*Osmunda cinnamomea*). Similar to above but of stockier growth, adapted to sun or shade and any location. Roots are bulky and collected from wet locations hence the price is \$5.00 per hundred extra.

SENSITIVE (*Onoclea sensibilis*). Of medium height, adapted to moist soil, sun or shade. Fronds are not as finely cut; and they spread to form a compact mass.

MAIDENHAIR (*Adiantum pedatum*). A beautiful dwarf type with feathery circular fronds. Thrives best in rich, moist, shady location.

POLYPODY. Dwarf, 6-inch evergreen type; grows naturally as a rockery fern in shade.

WOODSIA (*Woodsia ilvensis*). Another dwarf rock fern with downy foliage, not evergreen.

We can supply many other hardy ferns that are not native with us; for shipment direct from the collectors at right prices if desired.

GET OUR PRICES on any other stock desired. Although we specialize in collecting hardy ferns and plants, we grow a general assortment of Evergreens, Shrubbery and Hardy Perennials. **WHOLESALE ONLY.**
